The Promise of Sydney

VISION

We recognized that rebalancing the relationship between human society and nature is essential, and that ecosystems and their variety of life fully support our existence, cultural and spiritual identity, economies and well-being.

VISION

We acknowledged the increasing role of Indigenous Peoples', community, and privately-conserved areas and territories in reaching biodiversity conservation and societal goals.

We acknowledged the opportunities presented by new communication and other technologies to better understand and engage new constituencies, including young people in the world's rapidly expanding cities.

VISION

Promise to INVIGORATE ... our efforts to ensure that protected areas do not regress but rather progress. We will scale up protection in landscapes, wetlands and seascapes to represent all sites essential for the conservation of nature, especially in the oceans, and involve all of those who conserve.

Promise to INSPIRE ... all people, across generations, geography and cultures, and especially the world's expanding cities, to experience the wonder of nature through protected areas, to engage their hearts and minds and engender a life-long association for physical, psychological, ecological, and spiritual well-being.

Promise to INVEST ... in nature's solutions, supported by public policy, incentives, tools and safeguards that help to halt biodiversity loss, mitigate and respond to climate change, reduce the risk and impact of disasters, improve food and water security, and promote human health and dignity.

**INNOVATIVE
APPROACHES**

Innovative approaches for each of the eight streams ...

Stream 1 - Reaching
Conservation Goals

Stream 2 - Responding to
Climate Change

Stream 3 - Improving
Health and Well-Being

Stream 4 - Supporting
Human Life

Stream 5 - Reconciling
Development Challenges

Stream 6 - Enhancing
Diversity & Quality of
Governance

Stream 7 - Respecting
Indigenous & Traditional
Knowledge and Culture

Stream 8 - Inspiring a New
Generation

**INNOVATIVE
APPROACHES**

... and cross-cutting themes

Capacity Development

Marine

World Heritage

New Social Compact

- Design

Learning from success in protected areas

Protected areas are the cornerstone for conserving nature and related ecosystem services on which humans depend. The **Panorama** assembles positive examples of approaches in, and for, protected areas, to support learning from proven success – helping avoid reinventing the wheel, and bringing existing guidance frameworks to life with real-world examples.

The Promise of Sydney: Our Commitment to action for the Promise of Sydney

Below is the current list of commitments recorded during and after the IUCN World Parks Congress 2014. Please note that this list is continually evolving as commitments are made, expanded and added to the record.

The IUCN President invited further promises and commitments to be made. These can be notified to: promiseofsydney@iucn.org, and will be added to the online register of promises. Please also notify us if the commitment as stated below is not recorded correctly.

Commitments made by: [Governments](#) | [Organizations](#)

Commitments made by Governments to the Promise of Sydney

Australia: Education and research

Australia committed to:

1. A further AUD \$100K to support the partnership between local universities and private land-managers in the Tasmanian Land Conservancy. This money will support curriculum development to build capacity in protected area management in Australia, and across our region through agreements with our universities in the Asia-Pacific region.
2. A further AUD \$1.2 million for the Bush Blitz species discovery program, a public-private partnership between the Australian Government, the mining company BHP Billiton and Earthwatch Australia. This program has already uncovered more than 825 new species.

IUCN Green List of Protected Areas: Global Partnership

2014 GLPA in Numbers:

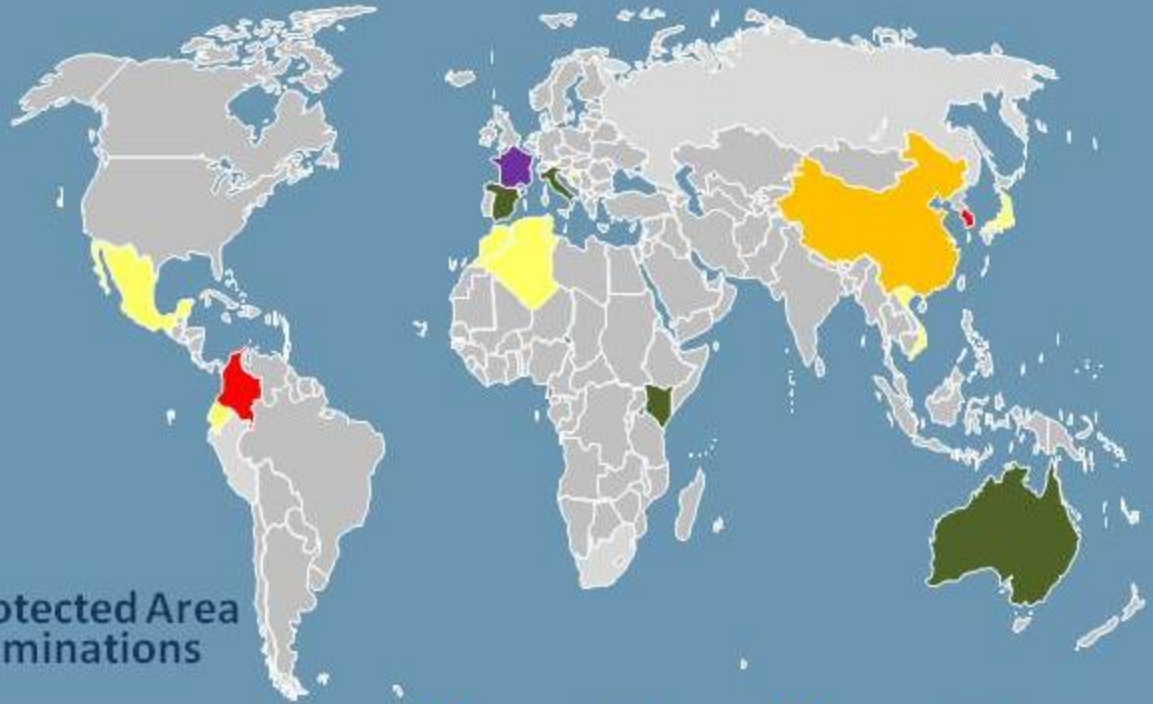

- 08** PARTNER COUNTRIES
- 50** PROTECTED AREA COMMITMENTS
- 28** PROTECTED AREA NOMINATIONS
- 23** ACHIEVED IUCN GREEN LIST STANDARD
- 202** EXPERT REVIEWERS Involved in process
- 12** NEW COUNTRY PROPOSALS

Protected Area Nominations

The IUCN GLPA requested a minimum number of candidates for the 1st phase.

However, given the high demand and open engagement, a total of 28 nominations were received

There is no cap on nominations; each is considered on its individual merits.

Demonstrate the value of protected area ecosystem services to all audiences

Apply a **rights-based approach** to conservation in protected area systems

Strengthen spatial planning to enhance the role and impact of protected areas

Support human life: food, water, risk reduction

Identify legal, institutional and social factors to **optimize synergy** for supporting human life

Promote conservation of freshwater ecosystems and **enable civil society in water governance.**

Build strong **evidence, policy and practical advice** for applying ecosystem-based disaster-risk reduction

PROTECTED AREAS AS TOOLS FOR

DISASTER RISK REDUCTION

A handbook for practitioners

Advice for disaster risk reduction specialists and protected area managers on how best to use protected area systems as effective buffers, to prevent natural hazards from developing into unnatural disasters

Nigel Dudley, Camille Buyck, Naoya Furuta, Claire Pedrot, Fabrice Renaud and Karen Sudmeier-Rieux

Build the evidence
for connecting
health and nature
incl. traditional
knowledge

Strengthen **policies**
and planning to
promote nature's
role in health and
well-being

**Improve
health and
well-being**

Promote the
preventative health
contribution made
by PAs, including
urban parks

Improve biodiversity
and **maximize**
human health and
well-being
outcomes.

Build **alliances and**
capacity across the
health and protected
area sectors

Parks and Reserves **VICTORIA**

Estimated avoided healthcare costs

\$ 198.8 million per annum benefit

\$ 323.9 million total budget for parks

Anchor PAs in environment, governance and land-use planning frameworks

Work with such intensive land and sea-use industries to deploy **sustainability standards**.

Integrate PA values into economic accounting, and measure, account, and report

Reconcile development challenges

Better understand PA financing needs and move towards long-term sustainable financing.

Apply **spatial planning regulation** to sustain ecological processes

Establish and employ **social and environmental safeguards**

“ Conservation Finance Alliance renews strategy to leverage and manage investment

ABOUT ▾ CTIS ▾ WORKING GROUPS ▾ MEMBERS ONLY LIBRARY ▾

Incorporate **facilitated dialogues** at the core of deliberations on complex challenges facing conservation

Embrace a **new ethic** that is just, equitable, reciprocal and respectful, linking biological and social-cultural issues

Adopt a clear set of **human rights standards** and capacity building techniques

Fostering a new social compact

Develop a “**rapid response**” redress mechanism for people impacted by protected areas

Take a **firm and vocal stance** against development activities that are destroying nature and communities

Sound the alarm and provide **active leadership** regarding the global biodiversity crisis

The Promise of Sydney

- “ Strengthening implementation, but it is not **WHAT**, but **WHEN** and **HOW** and **HOW MUCH**
- “ Scaling up applying innovative approaches
- “ Find new ways to connect issues, and interact across sectors for mutual gains and maximum impact
- “ What can you do as an individual, a protected area, an organisation or a government to address the urgency of doing more, better? What is your promise?
